JITENDRA BHOJWANI (DRESS BERRY) If we talk about 2019 fashion first we divide it into two categories first general fashion and second session fashion, we will talk about general fashion. In 2019 pastel colour or deep colour will not in fashion, dark colours will be in like red wine, deep blue, dark steel grey, sea green. Dresses like drap saree, gown, shrug, lehenga, skirts, top, sharara etc. are in the fash-

ion. In 2019 pure saree will

be in fashion like Banarasi

saree, pure silk saree etc.

SHILPI NANDA (Golden beads)

According to me first we have to decide about the personality and need because those thing people have in their wardrobe is old fashion and rest are new concept for them like garare - sharare. Basically all depend upon what you need, in which clothes you are comfortable and what is

your taste. Apart of that pastel and blink colour are in the fashion. If I talk about embroidery, heavily embroidery is not in fashion. In winter dark colour will be in trend. Nothing gets

out of fashion, only its style and pattern which can change.

The 2019 color forecast- Our 2019 color forecast has rustic, metallic and earthy. The metallic Gray, rustic brown and charcoal black play key role while defining the palette. The season will also witness the rise of military green and the colors such as vintage purple, royal blue and for the Indian market orange will surge in demand. In 2019, as per research there will be an anxious demand for the prints like vintage florals, Phulkari, and camouflage. Paisley will be revisited this season in the more refined way and its one of the must-have print to follow.
