

Makeup Trends in Summer 2020

The Summer 2020 season is all about eccentricities when it comes to makeup. Glitter, highly pigmented shades and excessive gloss are all key. While 2019 was all about no makeup look, trends 2020 are all about mixing and matching colour shades, neon's and lot of sparkles and embellishments. Glittery, Smokey eyes are a must try look this season. So be ready to look cool this summer, your beloved news paper "**Fashion Tantra**" bring a lot of ideas for it's valuable readers.

Ashita Batra (Pretty Women)

Spring has the beautiful colour of nature, and with that, my makeup look has beautiful coloured eyes in shades of blue, pink and neon shades of green and oranges- sunset eyes. To complement the look I like to add hint of colour on the lower water line with coloured liners. Beautiful candy tones of pink add the spring look of makeup. Over all look for the spring make up is fresh and lively.

Shivani Goyal (Makeup By Shivani)

Experiment with different colour eyeliner like neon green, blue and pinks. Clean skin, thick brows and a bright red lipstick looks more cool and classic. Try multi-colour eyeshades look on your eyes. You can choose and combo of colours, florescent colours or contrast colours. Purple is the new, try under your lower lashes and it looks very pretty in the spring season.

Divya Bansal (Looks)

Spring summer 2020 is all about one word 'fun'. Makeup needs to be soft and playful, try hot pink lipsticks, neon eyeliner, keep the brows structured, strong, polished. For Hair go short try the new BoB, play with bright hues in hair colour like blues and cotton candy. Try side braids for style.

Monika Sukhwani (Makeup By Monika)

Use very basic and minimal makeup and for clothes focus on bright colours and floral prints as this is spring and summer season. I like to play with more neutral and matte shades in this season. Keeping the foundation very natural according to your skin tone. Powder the skin well to avoid the face getting oily. Lips can be in contrast with eye shades or can be kept nude.

Vinita Soni (Makeovers By Vinita)

Spring is the time when one would take extra effort to try the fashion trends of the year. The color for the season is more cheerful and bright. Spring colors includes pastels-shades of cool blues, cheerful yellows, soft greens, Blushing pinks, and subtle purples that is opted more after months of blacks, browns, navys, mustards, and burgundys. One may be inspired to experiment more bold for spring 2020 with golden yellows, lime greens, and bright oranges instead. Needless to mention a regular skin care routine is to be opted, to ensure you look vibrant and cheerful as the spring falls. Depending on your skin type a regular Cleansing Toning and Moisturizing routine is a must to battle from the seasonal skin issues. It will help to keep your skin look healthy, hydrated and will prevent breakouts. Mantra for 2020 spring look is "play it cool" in whatever you do.

Makeup look for summer spring should be soft and subtle, playing with vibrant colors and sheer shades without missing sunscreen and water based products to keep your skin glowing and hydrating. While for hairs topknot bun, messy bun, high styled ponytails with volumised curls will bloom your flawless look in hot sizzling summers.

For Spring Summer, I would choose bright and neon colours in specific shades such as Biscay green, orange peel, coral pink, chive and saffron to enhance either my eyes or lips-that is only one face feature gets highlighted and the other is kept neutral along with a complimenting hairstyle.

This season's glow uses opalescent hints to creates a wet effect that's brighter than the glossy looks of the past. The clear base can be used as a top coat over your other eye makeup or alone as an eye-gloss effect. Use your fingertips to apply. Place it anywhere you want to look lit-up. You can also apply a touch of the glimmer directly to the center of the lids and up towards the crease. This will make your eyes appear larger and give the illusion of a glossy fantasy finish."
